

Why Advanced Systems Integration?

Advanced Systems Integration Solution Framework (ASiSF)

Confidence

Backed by our ASiSF methodology, your business will realize the benefits of your Microsoft Dynamics AX solution quickly and predictably. **ASi will complete your implementation on-time, on-budget, and on-spec.**

Because we draw from a large toolbox of proven guidelines, templates, and best practices. **ASi delivers more value to your Microsoft Dynamics AX solution**—streamlined just for your business.

Control

ASiSF methodology provides detailed requirements-gathering checklists that speed the discovery and business requirements definition process. **This ensures that your solution requirements are complete and will meet your business needs.**

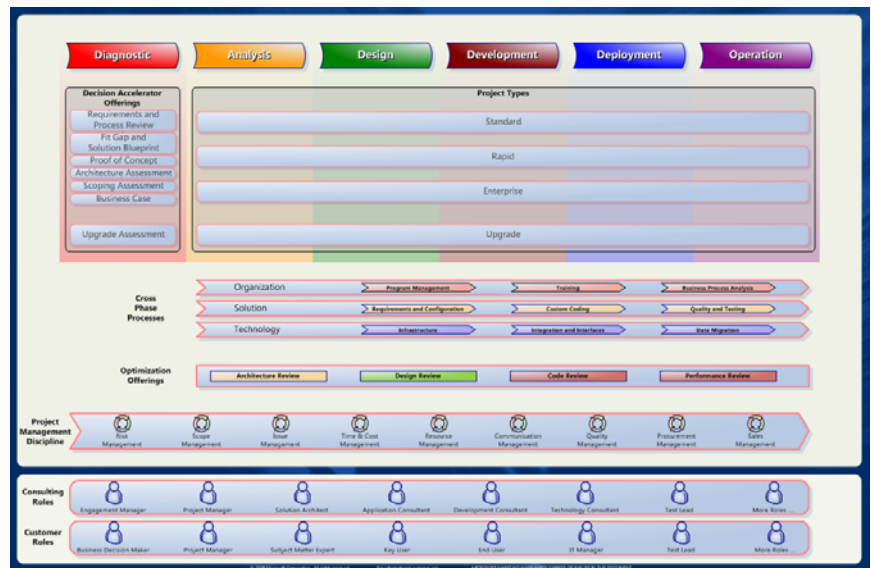

Visibility

Through the ASiSF methodology, it is easier to visualize the implementation process, allowing your company to **manage the timeline and communicate process changes to your employees and customers well in advance of the transition to Microsoft Dynamics AX.**

Skills, experience, and proven methodology tools for a successful implementation

You've got a lot riding on the successful implementation of your new Microsoft Dynamics AX solution. And, we do too.

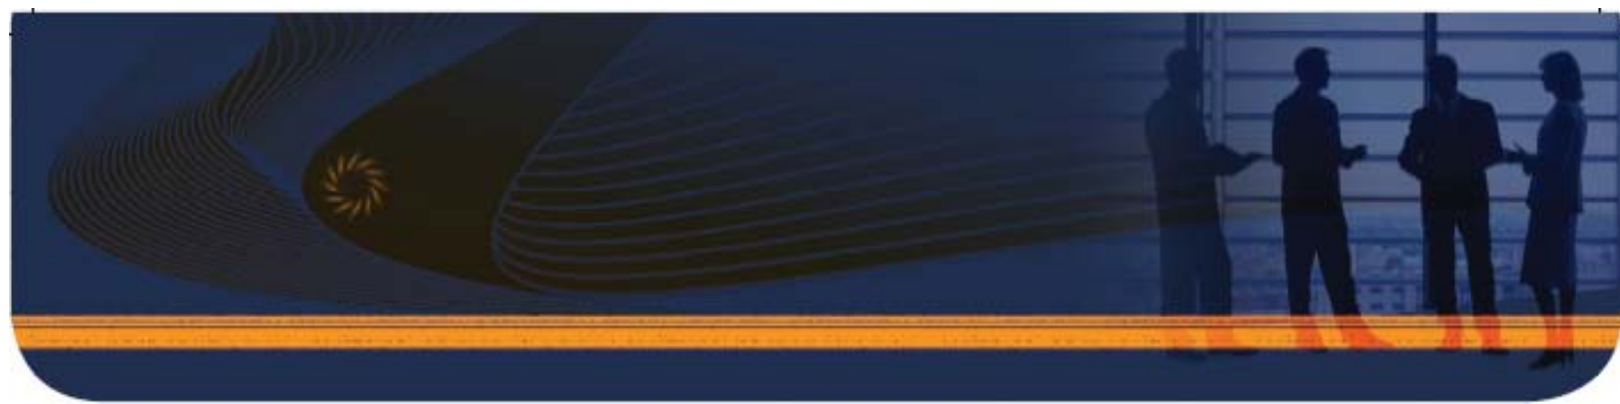

At Advanced Systems Integration (ASi), we use proven processes, tools, and guidance to repeatedly deliver successful implementations every time.

ASiSF provides in-depth guidance through all project phases and for all project team roles

ASiSF helps us deliver a predictable, on-time and on-budget Microsoft Dynamics AX implementation that can provide a quick return on investment, meet business requirements, and help poise your company for future needs as your business grows and evolves.

Learn more about how ASi will work with you to design and deliver a solution that meets all your needs. Call (949) 597-2170 or visit www.advancedsystemsintegration.com.

YOUR IMPLEMENTATION NEEDS AND THE ASI SOLUTION FRAMEWORK (ASISF)

Guidelines and Templates Proven by the *Project Management Institute*

Effective project management is critical for ensuring a successful implementation. The ASiSF methodology provides tools and guidance that are tested and proven by the *Project Management Institute*. This helps lead a successful project implementation by managing productive team meetings and building essential and effective communication.

Thorough Preparation and Change Management

Driving change and ensuring that new processes are widely adopted are vital components of any business transformation initiative. Change management guidance provided in the ASiSF helps prepare your organization for process optimization, improved experiences, and increased productivity.

Cost-effective Training

During your Microsoft Dynamics AX implementation and beyond, it is important to ensure your team members are fully trained on all the features and functionality of your new solution. We will help you access and navigate on Microsoft's CustomerSource, a key benefit of the Business Ready Enhancement Plan, as well as ASi's own training tools and offerings. CustomerSource gives you access to valuable online training tools, tips and tricks to help your users get the most benefit from the new solution, and it links your business to a broad community of other Microsoft Dynamics AX users from which you can share experiences and learn.

Risk Management

Effectively managing risk and change in business requirements is critical to the success of your project. ASiSF provides detailed guidance and recommended processes so ASi can better manage risk, scope, and changes throughout the implementation project.

Executive Management Buy-in and Support

Executive management involvement and support during the selection and implementation process is critical to the successful launch of your Microsoft Dynamics AX solution. ASiSF provides in-depth guidance on the roles, responsibilities, and timelines that can help maintain appropriate executive-level engagement throughout the implementation project.

Resource Availability

The ASiSF methodology helped ASi create an ecosystem of Microsoft partners that meet a certain standard of implementation practices and quality, which ensures that your needed resources are met and available throughout the Microsoft Dynamics AX implementation.

The Advanced Systems Integration Difference

Advanced Systems Integration is committed to providing real and tangible value to its clients during the implementation phase and beyond, building long-term business partnerships as outlined in its 5 Point Promise to provide:

Deep Manufacturing Expertise

Founded by veterans of the manufacturing industry, ASi only adds consultants with solid manufacturing expertise to its team.

Trained, Talented Team Members

Consultants are extensively trained on Microsoft Dynamics AX and ASi solutions and must meet rigorous certification and testing requirements.

Proven Procedures

ASi's exceptional project management skills and best practice methodologies ensure that there are no surprises during implementation.

Customer-Centric Care

Customers are welcome to visit ASi's state-of-the-art customer lab and training center facilities.

Industry-Leading Solutions

ASi targets consumer goods and industrial goods manufacturers with certified solutions around Retail, Apparel & Footwear and the Doors & Window industries.
